1. Course title: COMPUTER NETWORKS
2. Course code

3. Validity of course description: 2019/2020

4. Level of studies: 1st cycle of higher education

5. Mode of studies: intramural studies

6. Field of study: AUTOMATIC CONTROL AND ROBOTICS, ELECTRONICS AND TELECOMMUNICATION, INFORMATICS

7. Profile of studies:

8. Programme:

9. Semester: 5

10. Faculty teaching the course: Automatic Control, Electronics and Computer Science

11. Course instructor: dr inż. Jerzy Mościnski

12. Course classification: common courses

13. Course status: compulsory

14. Language of instruction: English

15. Pre-requisite qualifications: Course attendants are supposed to have general knowledge concerning computers and computer applications, including using computer networks services. Students are also supposed to possess practical skills concerning computers and Internet usage as well as programming in at least one high level programming language. It is assumed that students passed the following courses: Fundamentals of Computer Programming, Theory of Computer Science.

16. Course objectives: Course is part of specialized curriculum content and is related to education in areas of computer network technologies, Internet techniques and communication technologies. The course aims objectives include having the students got acquainted with hardware and software solutions in computer networks, benefits from computer networks based communication, usage and administration of network operating systems and network programming.

17. Description of learning outcomes:

7. Is able to work in team and design and implement components of larger tasks of establishing communication and running services in computer networks

laboratory exercise laboratory K1A_K02

18. Teaching modes and hours

Lecture  30 h / BA / MA Seminar / Class / Project / Laboratory 30 h

19. Syllabus description:

Lecture:

Overall objectives of the course include providing students with basic as well as advanced knowledge concerning components of computer network: communication methods, server computers, client computers, network infrastructure. Types of services offered by computer network servers are covered in detail as part of the course. Internet services, Internet and TCP/IP protocol suite, TCP/IP protocol structure, physical, data, network, transport and application layers tasks in computer network are also considered. Specific topics covered during course lectures and laboratory exercises include the following: computer networks types and systems; local area network LAN and wide area network WAN; packets, frames, reliable and unreliable transmission; LAN cabling systems, physical topology, interfaces; Internet and TCP/IP protocol suite; network servers and types of services; Internet network protocol, TCP/IP protocol family. TCP/IP protocol structure, tasks and services concerning the physical layer, data layer, network layer, transport and application layers in computer network; DNS system and its role in naming hosts in computer networks; WAN techniques, routing and tracing routes; internetworks, architecture and protocols; basic applications of computer networks services; using electronic mail systems; www pages and browsers; advanced elements of UNIX/Linux operating system using; multimedia networking applications; streaming audio and video with networks; quality of Internet services – differentiated and aggregated services models; security in computer networks; cryptography, authentication, certification, firewalls; Internet commerce; computer network management.

Laboratory:

- IP addressing and configuration.
- System configuration, graphical and command line.
- DNS & DHCP protocol, DNS server configuration.
- Security issues, firewall configuration.
- Simple www server programming and configuration.
- PHP programming, Internet based databases.
- Network protocols and application analysis.
- Internet of Things.
- UNIX/Linux operating system basics.
- Bash shell programming.
- Client/server programming.
- Client/server programming applications.

20. Examination: yes – at the end of semester 5; written form

21. Primary sources:

22. Secondary sources:
