1. Course title: PERFORMANCE EVALUATION OF COMPUTER NETWORKS
2. Course code: PECN
4. Level of studies: MSc
5. Mode of studies: intramural studies
6. Field of study: informatics
7. Profile of studies: general academic
8. Programme: -
9. Semester: 1
10. Faculty teaching the course: Faculty of Automatic Control, Electronics and Computer Science
11. Course instructor: Prof. dr hab. inż. Tadeusz Czachórski
12. Course classification: common
13. Course status: compulsory
14. Language of instruction: English
15. Pre-requisite qualifications: knowledge of probability theory and stochastic processes on the level taught at BA courses; rudiments of computer networks architectures and principles of their performance, especially of the performance of communication protocols (TCP/IP)
17. Description of learning outcomes:

<table>

18. Teaching modes and hours
Lecture / BA / MA Seminar / Class / Project / Laboratory+
Sem 8: lecture - 15 h, laboratory - 15 h

19. Syllabus description:

Lecture:
avoidance (threshold, leaky-bucket, sliding window, jumping window, push-out queue) algorithms. Models of all optical networks routing, a model of electrical-optical edge router. Diffusion and fluid flow approximations in the analysis of transient states, application to the analysis of packet queues in IP routers, models of active queue management (e.g. random early deletion) in IP routers. Statistical properties of internet traffic (self-similarity, long term autocorrelation) and their influence on network performance.

Laboratory: Simple simulation queueing models and models of computer networks written with the use of OMNET++ system.

20. Examination: no examination

21. Primary sources:

22. Secondary sources:

23. Total workload required to achieve learning outcomes
